

CANONICAL REFERENCE

Where to Buy & Trade RBNT

Every live venue for native and wrapped RBNT, checked directly and cross-referenced against independent sources.

LAST VERIFIED AUGUST 8, 2026

RBNT trades in two forms. **Native RBNT** is the token on Redbelly Network's own chain, traded spot on five exchanges.

Wrapped RBNT (wRBNT) is a separate, bridged token on Ethereum and Solana, used for DeFi and cross-chain transfers. No live futures or perpetual market for RBNT was found on any tracked exchange as of the date above. If one appears elsewhere, verify it directly - it is not confirmed in this document.

01 Native RBNT: Spot Venues

Five exchanges list native RBNT against USDT. All five were checked directly on their own trade pages.

EXCHANGE	PAIR	STATUS	LINK
Gate	RBNT/USDT	Live	gate.com/trade/RBNT_USDT
MEXC	RBNT/USDT	Live, highest volume	mexc.com/exchange/RBNT_USDT
BYDFi	RBNT/USDT	Live	bydfi.com/en/spot/RBNT_USDT
BitMart	RBNT/USDT	Live	bitmart.com/trade/RBNT_USDT
WhiteBIT	RBNT/USDT	Listed, thin - no trades in the hours before verification	whitebit.com/trade/RBNT_USDT

02 Wrapped RBNT (wRBNT): A Separate Token

wRBNT is a bridged representation of RBNT, not the same token. A change to one does not mean the other has changed. Confirm which one a venue actually lists before you compare it to this table.

Ethereum 0xb45ffb51984d626ee758b336c61cf20990c6bf13

Tradeable through [Uniswap](#). Volume is thin - check pool depth before a large swap.

Solana 2GBVt2ENvbHepuJMWYTPkfpWUabAhsaXToYw8UphxS3

Confirm the current pool directly (for example on Solscan) before trading. A specific live DEX pool was not independently reconfirmed in this pass.

03 Spot vs Futures

No exchange currently lists an active RBNT futures or perpetual contract. Some exchange marketing pages reference futures trading in template copy that appears on every listed token regardless of whether a market exists - that copy is not evidence of one. A futures listing appearing or disappearing anywhere is not the same event as a spot listing changing, and the reverse is also true. Check each independently before treating one as confirmation of the other.

04 How This Was Verified

Every venue above was checked directly against its own trade or listing page, and cross-referenced against at least two independent sources - CoinGecko's live markets table, CoinCodex's exchange listing, and CoinMarketCap's contract fields. The Ethereum and Solana contract addresses were matched against CoinMarketCap's own contract listing for the token.

This is a dated snapshot, not a guarantee. Listings on a token at this market size can change within days. Reverify each link before relying on it for a transaction.
